

Manufacturer warranty on selected products

Premise

The company Grothe sells building technology products. This primarily includes the following systems: **intercom systems, video monitoring systems, alarm systems, access control systems, building automation, signaling devices.**

The end customer/consumer purchases these products. Proof must be provided that the products purchased by the end customer were sold by Grothe (sales receipt). If the products were purchased via a third party (e.g. electrical wholesale trade, webshops), then the third party must provide the end customer with proof that Grothe has supplied the products.

1. General

Grothe GmbH shall provide this manufacturer warranty vis-à-vis consumers for products in addition to the statutory warranty that the consumer is granted by the vendor.

It shall be valid in addition to the obligatory statutory liability regulations, for example as laid out by the German Product Liability Act and statutory warranty legislation and shall apply regardless of fault, in accordance with the following stipulations.

"Consumer" in terms of this manufacturer warranty shall be, in accordance with Section 13 of the German Civil Code (BGB), any natural person who is the owner of the product and who did not purchase said product in order to resell it to third parties or to install it on the premises of third parties within the scope of his/her commercial or independent professional activities. "First customer" shall be the person who is the first to resell or install the product from Grothe GmbH within the scope of his/her commercial or independent professional activities. This manufacturer's warranty applies to consumers based in the European Union and EFTA countries.

This extended manufacturer warranty shall refer exclusively to products specified in the list provided in the attachment. The warranty period shall be 5 years and shall begin from the time of purchase of the product by the end customer (the date on the sales receipt shall be determinative in addition to the conditions formulated in this warranty).

2. Warranty protection

Applicable to products that end customers have purchased (sales receipt):

Grothe GmbH shall guarantee consumers that the products are free of material, manufacturing and constructional flaws. Decisive in this case is the state of the art in science and technology at the time of manufacture. The warranty shall cover only deficiencies in the functioning of the device. Optical changes attributable to aging and usage shall be excluded from the warranty. The flaw about which the consumer has submitted a complaint must already have existed in the product at the time of handover to the consumer.

Claims for compensation for consequential loss or claims arising from product liability shall be valid only in accordance with the mandatory statutory provisions and are not covered by this manufacturer warranty. This warranty shall apply for a term of 5 years as of the date of purchase by the end customer. The warranty term shall not extend as a result of the granting of services within the scope of this warranty.

The replacement delivery shall only be granted as a gesture of goodwill and without acknowledging any legal obligation. The warranty term shall not recommence in these cases, but instead shall be limited to the original warranty period.

3. Written notification of deficiency

The consumer can assert his/her rights from this warranty vis-à-vis Grothe GmbH or the retailer/first customer from whom the end customer purchased the product, by submitting written notification of the deficiency within the warranty period.

An additional prerequisite shall be that the consumer reports the deficiency within two months after he/she became aware of or should have become aware of the deficiency. It shall be the responsibility of the consumer to prove that the warranty has not expired (for example by providing the sales receipt from the first customer).

4. Services in the case of a warranty claim

Grothe GmbH shall be liable only to replace the defective product. The consumer shall bear the cost of installing the replacement product. The warranty shall cover only free delivery of the replacement product.

In the case of replacement, the old product shall be replaced by a new product of the same type, quality and model. If the product concerned is no longer manufactured at the time of deficiency notification, Grothe GmbH shall be entitled to supply a similar product. The consumer shall be obliged to collect the new product from the nearest Grothe GmbH retailer himself/herself, unless otherwise agreed.

5. Prerequisites and exclusions

The prerequisite for the effectiveness of this warranty shall be correct installation and maintenance as described in the user manual and according to the recognized rules of technology (e.g. by a master workshop or an authorized specialist company), adherence to the operating instructions, and use of the Grothe GmbH products according to the technical guidance and care instructions from Grothe GmbH.

Assembly instructions, operating instructions and instructions for use are enclosed with every product and are available at www.Grothe-GmbH.de.

The warranty shall not cover:

- breakable parts, e.g. plastic housing, due to breakage;
- consumables, e.g. batteries, due to usage;
- slight deviations of the product from its specified condition that do not affect the utility value of the product;
- operating and operator errors, damage caused by aggressive environmental conditions, chemicals, cleaning agents;
- product defects resulting from installation, transportation and trial operation of the purchased item and damage caused by the defective product (so-called consequential damage);
- showroom products and similar.

The validity of the warranty shall end in the case of:

- non-observance of the assembly instructions, operating instructions and instructions for use provided with the product or available at www.grothe.de;
- installation, maintenance or repair by persons who do not have the required expertise;
- product damage caused by the vendor, installation technician or third parties;
- defects attributable to normal usage or intentional damage;
- incorrect installation or commissioning;
- products that have not been or are not being used for their intended purpose;
- damage caused by force majeure or natural disasters, particularly, but not limited to, flooding, fire or frost damage;
- in the case of negligent damage, contributory negligence shall be attributed to the consumer/end customer.

6. Non-applicability of warranty

If a product defect is later regarded as not covered by this warranty, the costs incurred for shipping and transporting the product shall be borne by the consumer himself/herself. Moreover, the consumer shall bear the costs, including labor costs, that are incurred through inspection of the product, as well as the costs of removing and reinstalling the product. If, after being informed of the non-applicability of the warranty and of the estimated costs for replacement of the product, the consumer nevertheless wishes replacement of the product, he/she shall additionally bear the costs of the work required for replacement.

If the product did not already exhibit the flaw at the time of handover to the consumer, Grothe GmbH shall decide in each individual case whether the defect is nevertheless to be rectified as a gesture of goodwill.

7. Statutory rights

The consumer shall be entitled to the applicable statutory rights in addition to the rights from the warranty. These statutory rights, which may in some case be more favorable for the consumer, shall not be limited by the warranty. The warranty shall also not affect any rights that the first customer and, where applicable, the consumer has vis-à-vis the vendor from whom the first customer/consumer purchased the product.

8. Place of fulfillment, place of jurisdiction and applicable law

This warranty shall be subject to German law, with the exclusion of the United Nations Convention on Contracts for the International Sale of Goods (CISG) from April 11, 1980. The place of fulfillment for the obligations under this warranty shall be Hennef, Germany. The place of jurisdiction shall be Siegburg, Germany.

Grothe GmbH
